

G'day Reader,

In this issue we launch our class 8 galvanised nylon insert nuts, announce the winner of our test cricket tipping competition, try to clear some old stock and remind you about our specials capabilities.

GALVANISED NYLON INSERT NUTS

Great news we have upgraded all our galvanised nylon insert nuts from M10 to M24 inclusive from class 5 to class 8. If your customers want to use galvanised nylon insert nuts with 8.8 threaded rod you can now supply the technically correct product at no extra charge. All our class 8 nylon insert nuts will be sold at the same price as our previously stocked class 5

Winners are grinners

Well at least the winner of our 5th Ashes Test tipping competition is grinning as Bill from Allfast Solutions walks away with two cartons of beer. Bill correctly went for a draw and tipping 388 was the closest to England's first innings score of 377.

I'm getting a lot more sleep these days!

SPECIALLY MANUFACTURED PRODUCTS

Whether the desired material is brass, stainless steel, mild steel, high tensile steel or something more exotic we are happy to manufacture fasteners and components out of virtually any material. Any thread form, internal or external and multiple finishes. Please send your enquiries (and drawings) to sales@holdite.com.au

EXCESS AND REDUNDANT STOCK

We definitely are not exiting conelock nuts but we do have a few 1/4" UNF conelocks too many. So for a limited time we are offering **1/4" UNF conelocks at \$3.95/100.**

sales@holdite.com.au

We are still trying to clear the remnants of our stainless steel nylon insert nuts.

304 stainless steel nylon insert nuts M10 at \$8.10/100.

316 stainless steel nylon insert nuts M16 at \$38.00/100.
